This action is in response to the paper file 6 March 2006.

Claims 20-32 are under consideration.

Rejections Withdrawn

Claim Rejections - 35 USC § 112

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 26 was rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has explained the support and the rejection is withdrawn.

Rejections Maintained

Claim Rejections - 35 USC § 112

Claim 28 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which

Application/Control Number: 10/091,567

Art Unit: 1648

was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant argues that the specification has been amended.

Applicant's arguments have been fully considered and not found persuasive.

The claim language still does not make sense (claim 28 (4)). It is suggested that from what is used in the examples, that the claim could be amended to read "[of] <u>using</u> 10 mg/ml <u>of plasmid DNA stock solution</u>" or something to that effect.

Claims 29-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The invention is drawn to methods of treating or preventing or inducing long lasting immunity.

Applicant argues that the Office is being to limiting and narrow in the application of what is required by the Office in terms of patentability and that the specification shows that the liposomes are effective.

Applicant's arguments have been fully considered and not found persuasive.

The claims are not limited to the liposomal formulation taught and used in the specification or a formulation made in a similar manner and Applicant has not shown the protection of mice as disclosed correlated to the features of the claimed methods (preventing and treating, and eliciting long lasting protection).

Thus, the rejection is maintained.

Claim Rejections - 35 USC § 103

Claims 20-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wheeler et al. and Webb et al. in view of Sha et al and Promega Catalog (the last two references previously cited).

The invention is drawn to an encapsidated plasmid influenza vaccine.

Applicant argues that the invention uses reverse phase rotary evaporation (RPRE) and not detergent lysis as used in the prior art, no thin film is generated, that Webb *et al.* does not teach plasmid encapsidation but teaches encapsidation of an anticancer drug, and that there is neither motivation to combine nor a *prima facie* case of obviousness.

Applicant arguments have been fully considered and found persuasive in part.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., RPRE and thin film) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read

Application/Control Number: 10/091,567

Art Unit: 1648

into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that Webb *et al.* is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, both Webb *et al.* and Wheeler *et al.* use PEG CER compounds in the lipid formulation. Both references teach similar compounds used in similar methods and thus they are not unrelated.

Thus, the rejection is maintained.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 10/091,567 Page 6

Art Unit: 1648

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Myron G. Hill whose telephone number is 571-272-0901. The examiner can normally be reached on 8:30 am-5 pm Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bruce Campell can be reached on 571-272-0974. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
